

## **Media Statement**

### **GAS SUPPLY RESUMPTION**

SHAH ALAM, 21 April 2025 — Panasonic Manufacturing Malaysia Berhad (“PMMA” or “the Company”) is pleased to inform that the gas supply to both of our manufacturing plants in Shah Alam has fully resumed as of yesterday, following the earlier disruption caused by the gas pipeline incident on 1 April 2025.

Prior to the full resumption of gas supply, PMMA has implemented mitigating measures such as the utilisation of alternate sources of gas to ensure the continuation of production. With the gas supply returning to normal, the production of the fan and electric iron products is now back in full operation.

Mr. Takashi Sugihara, Managing Director of PMMA said “We have been able to minimise operational impact and aim to recover the loss of revenue within this quarter.”

The Company will continue to monitor the situation closely and provide updates, where necessary.
